

**NOTE: THIS METHOD HAS YET TO BE TESTED BY WHC-TV**

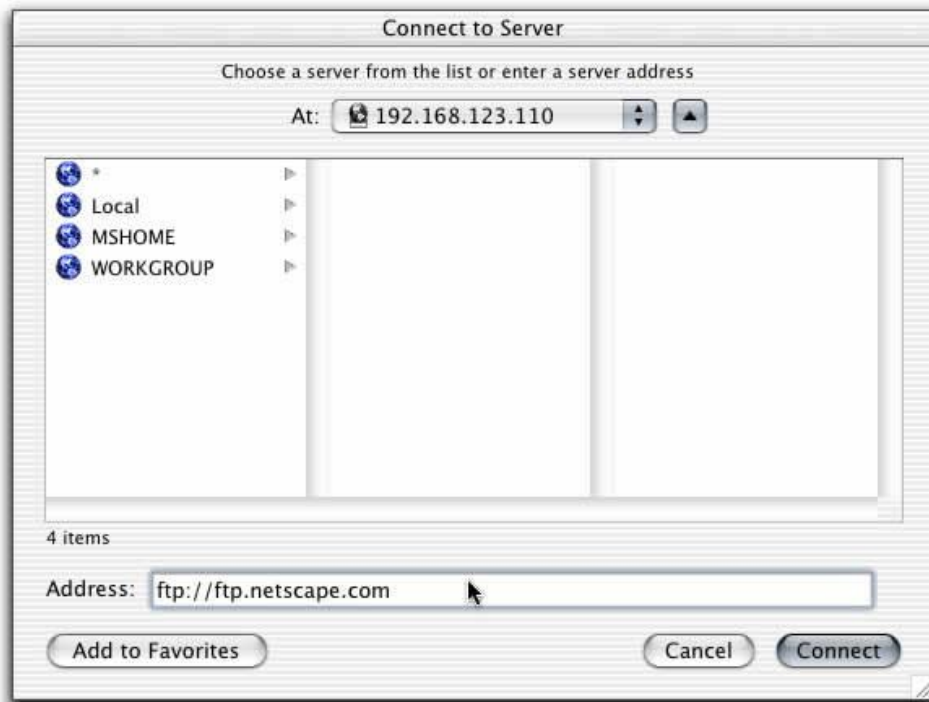

(Screen shots from CreativeMac.com)

-To connect to an FTP server in Mac OS X 10.2, go to your Finder, and select the Go menu. Choose the "Connect to Server" option.

-In the "Address" field type in <ftp://173.14.137.214/Projects/>

-Press Connect

-If prompted for a username and password keep both fields blank and click “OK”

-The site now mounts on your Desktop as if it were just another hard drive on the local network.

-Open the ftp site and create a new folder with your first and last name.

-Open the new folder and drag and drop your finished video file.

-Your video will be posted online at [www.whctv.org](http://www.whctv.org) within 24 hours.
